

# Heightened Disease Risk for UK Poultry - Newcastle Disease

**Stay Vigilant. Stay Protected.**

Following one of the most challenging avian influenza seasons on record, the UK poultry sector now faces another serious threat.

Newcastle Disease risk has been raised to “medium” for the first time since 2018.<sup>1</sup>

At a time of rising costs, continued uncertainty, and external pressures beyond our control, robust hygiene and biosecurity remain among the most effective defences available on farm.

Mirius supports this critical frontline with trusted, DEFRA-approved disinfectant solutions, including Omnicide® and Virucidal WP, to help strengthen protection and disease control measures this season.

## Omnicide

**A leading disinfectant choice for more than 30 years**

- Non-corrosive formula\*
- Easy to use with foaming action for maximum surface contact
- DEFRA approved for Diseases of Poultry at 1:90 dilution

## Virucidal WP

**Powerful, versatile, fast-acting disinfectant**

- Rapidly dissolves in water
- Excellent stability and broad efficacy against viral, bacterial, and fungal pathogens
- DEFRA approved for Diseases of Poultry at 1:200 dilution
